Rules

Do not delete other people’s section without permission and PLEASE archive all the playerr deletions

Deletion is NOT cleanup

Everyone’s vote counts and is equal in weight to the playerr peers. The player cannot change someone else’s vote unless it is on their behalf

Don't spam please

Consider these things BEFORE adding an item/feature/mob/attribute/mechanic/structure

1. Can the purpose of what the player're adding already be done with preexisting items unless the player're making something easier?
2. Will this item interfere with items this mod is about to add or already existing items to the game?
3. Will this feature the player’re adding be useful (used in speedruns, hardcore players, etc.) at all in the in-game experience or is it a fun feature to add?
4. Is this feature too realistic and unoriginal?
5. Has this feature or similar feature been heavily downvoted if posted on r/minecraftsuggestions?
6. Have the player agreed with the others or won a debate in favor of the addition?

Announcements:

New section for Theodore and Zafar

Deletion is not cleanup [see also: archiving]

Before outright rejecting a suggestion, consider why the player are rejecting it and consult the list.

1. Is it because it does not fit the ‘theme’ of Minecraft? Try redoing the name but keeping the utility or simply rewording it to fit the theme. Some utilities are great, but their names do not fit with Minecraft's theme
2. Is the utility overpowered? Try nerfing it or making it hard to get (like the totem of undying) or if it is too garbage try making it worth something (like the echo shard)

Changelog since 4/24/26 [PLEASE USE CAMEL CASE!!]

Deleted Meerkat (Approved by Eric and Sai)

Deleted Pot husk (Approved by Eric, Aadi, and Sai)

Deleted Door zombie (Approved by Eric, Aadi, and Sai)

Caleb(Kinda doesn’t exist anymore?)(DELETION IN 1 WEEK FROM 11/4/2026)

D! foot Corrupted Angel (Boss, Mob?????) X-Alex If in void X-Eric Needs convincing-Sai X-Zafar aadi has a weird name-aadi

A version of the normal angel but bigger with half of it the normal color and texture of angel other side however is closely resembling the void with a halo on its head that is half white yellowish that shines and the other half cracked and dark purple. Can fly around and attack by throwing pieces of void has like 25 hp. Normal mob version

Boss version A version of the normal angel but bigger with half of it the normal color and texture of other side however is closely resembling the void with a halo on its head that is half white yellowish that shines and the other half cracked and dark purple. Except it also has dark void tentacles on half of its light body. Has four wings Two normal angel wings on void side and Two corrupted angel wings on other side. Can throw void shards as a ranged weapon to damage player. Can also teleport behind player to summon a short melee sword to attack but then immediately

teleport to where it was again, can be blocked if the playerr holding shield and crouching even if the player are facing front to make it less op. Floats a little bit above ground as a custom animation. Ultimate attack(final move at 1hp) can be canceled by killing it with any weapon before its initial windup. What it does is it summons a giant black hole from its hands then charge at the player grab the player so the player cant escape and then he explode but the black hole will remain and do damage to the player as long as the player are near it and pull the player towards it for 15 seconds. Can drop the corrupted halo and the corrupted dagger as loot. New attacks, Can attack with dark magic will show a small summoning circle beneath the player before it lunches out a void tentacle if it hits the player it stuns(traps) it for 2.5 second and deal half a heart damage no matter what for the duration of the 2.5 second so 1 and a half heart. If it miss then it grabs a piece of the surrounding terrain nd throws it at the player. Second phase?????? If i decide to give it a second phase it will probably be the same design and attacks except stronger and more powerful with more range but for now im not planning to. NEW!!!! The corrupted angel has the ability to summon a shadow clone that has half its health but same attack and does 1.12x more damage

- Chinese Fire Dragon (boss) X-Caleb X-Alex X-Eric Needs convincing-Sai perhaps/needsconvincing-aadi no-Zafar
  Can be a good boss if need weapon loots.
  Have 325 health can breathe fire as weapon can attack using mouth or claws has a small chance to do burn damage. Can Attack without getting close.
  Can get tamed although the player only have one try and is a low chance if tamed need a fire hearth saddle to ride. Fire hearth saddle need TBD ingredients to make. Can use to fly. Can use it to attack but we could make it so it does not do as much damage has a rare chance to drop dragon claw

can be used to make TBD. Can be found in TBD. Can be others type as well like water and earth. Only difference would be breath weapon so water would be like a water pulse and earth can be a tornado or a bunch of rocks hurled at the player in a cyclone way. Deals more damage if the player hit it with fire aspect for fire version. I'mm still working on this so yeah. And for a more powerful version for the earth one the player need a dragon claw 2 piece of dirt 1 piece of ancient sapling(boss drop exclusive to the earth dragon) to make a core of the earth, if giving to the dragon makes it more powerful makes the horns bigger the jaws stronger with more teeth and two long fangs on the bottom jaws with bigger body and faster attack speed faster flying speed more stamina for flying and more attacks, although it reduces health to balance the form a bit. New attack include tornados with debris and rocks. Growing small branches or sharp trees that appear for a second to deal damage, along with passive ability that has a 5% chance to activate which makes it so he spawn 2 small tree mobs that are a little bit more then half the size of average player that has one move which is range that throws tiny projectile branches that deals the same damage as reguler full drawn bows. Also can make the dragon appearnce cooler as just cosmetic, take extra damage to fire damage, deals ectra damage to any mobs that is of the earth, including water rocks, etc

- Dragon claw(loot) X-Eric X-Alex Why? We already have dragons scales? Needs convincing-Sai
- can be dropped by defeating boss
  I'm thinking that this could do something but not sure yet.
- Corrupted angel halo(loot) can probably use for like some kind of special effect but im not sure what yet. X-Eric
- I still need to find a use for these loots, so yeah.
- T-rex Skeleton(structure) Can contain some loot ad stuff.

- Chorus leviathan BIG BOSS X-Alex X-Eric (add it to the end anchor room boss) -Eric Needs Convincing-Sai
  Make the altar the chiseled cauldron block -Eric u should make it so it can throw a bunch of mini void tnt at u also Yes -Zafar
  Can be found in the end anchor room. Upon entering the room there will be a alter (chiseled cauldron block) in which if right clicked will summon the boss the boss is like a giant reptile with a big crocodile like tail it has chorine armour and its head with 4 tentacle with small mouths a one eye on each tentacle. Its jaws are full of sharp teeth and its eyes are dark ominous purple that glows. It can attack with its tail tentacle mouth and can summon small mobs to do extra damage. It has ranged attacks like tiny purple laser and its tentacle can extend to a certain range to hit player. Once gets half health it goes into second phase in which it does more damage the lower health it gets and its attack gets more ranged as it trys to protect itself. And. once it dies it shoots a giant laser beam that puts the player on health no matter what ignoring all resistance and absorption heart normally his normal attacks like tail whip bite and his tentacle does 4 heart with out armor. If it summons its small mobs aka abyssal traitor which are mobs it could summon and if it hits the player five time it reduces the playerr armor by like 5 for 5-10seconds. His attacks biting does 2 hearts, tail whip if direct hit causes a shock wave and does 5 hearts otherwise the shock wave just knocks the player back really hard, its little tentacle does .5 heart each time it hits the player that stacks by .5 heart for each armour the player don’t have. Small lasers does 1 heart. Big laser does 2. bigger laser does 3. and strongest one gets the player down to half a heart no matter what. Its chorine armour reduce the attacks of arrows sword and basically all melee. Potion does extra damage to it and effects like poision does not effect it. Majic attack does extra. Explosions deal normal amount od damage. Drops chroine armours. And chorine swords. And has a smallll chance to drop a smaller version of itself as a

pet kinda like a dog that floats above the ground as custom animation has same attack as its big adult. but can’t spawn mobs and deal WAAAY less damage.
Is

- Mecha Wither X-Alex Needs Convincing-Eric Farty-Sai no -Zafar
- can be found in some kind of mechanical lab underground and can at first look like its powered down but in order to activate it the player need either a mecha core or a nether star like from a normal wither. It can fire missiles from it smaller heads, laser, big laser, bigger laser. Can also lunch bombs.(obviously not very big bombs.) Has a second phase in which it gets surrounded by red sparks which makes it looks like its powered up and become immune to arrows pr trident or any projectile moves that physical so like magic stuff don’t count and can hit it. In this phase it can spawn smaller bots that can fire rapid little laser that has a 2.5 to 5% rate of setting the player on fire and stunning for .5 seconds. Im thinking of adding lifesteal in second phase so when it damage the player it rehealth but that might make it too op. As for the mecha wither itself we can make it so that it can fly but has a set height limit and make its second phase closer to the ground for easier hitting it. UNDER Consideration As for loot to make Sai happier maybe deciate.

- Giant pyramid Structure Needs Convincing-Alex We already made the desert temple better -Eric No-SAI
yes -zafar
- i know we already has deasert temples but this ca be a upgraded version that can has its own boss or weapons. Or traps.

- NEW REALM. X-Eric might be kinda hard to code but X-Alex THIS EQUALS HOLLOW KNIGHT I DISSAPROVE-Sai

The entering meathod is way too much like hollow knight i dissaproove and concept is very mid so no -Zafar

This new realm can be called the dreamers realms and every loot the player had will be gone from the playerr inventory as the playerr in the realm but once the player exit the player will have the playerr loot back. To enter this realm the player need a comfy bed and a dream catcher which has chance to drop by killing the corrupted angel boss(see also;corrupted angel) and to exit the realm simply right click the dream catcher. The player can mine the lucid stone in the realm but the player can't take it back with the player as it would just disappear. This realm is for xp as the player gain xp for mining the lucid stone or kill the mobs in this realm like the lucid beetle and dreams version of the normal minecraft hostile mobs. The player can only use the playerr fist and can't craft but the mobs only deal half a heart and has only 3 hearts. There is a boss in the realm called the Dream keeper which is a boss that the player only need to hit 5 times to win however when first engaging the boss it hits the ground sending the player platforms up and apart in which then the player has to parkour and dodge or kill the dream mobs the boss spawn until the player get to the boss platform and hit him once. When the player hit him he sends the player back to the first platform and changes the platform making it harder and making the mob do half a heart of damage he buffs the mobs like this every two rounds so at the end the mobs will do 2 hearts or maybe 3. Once defeating the boss it will drop a lot of xp almost twice the amount of the ender dragon and drop 1 to 20 arrows that can put normal mobs to sleep but not bosses or mini bosses and only for a few seconds. BUUT if the player are lucky it can drop a key to the realms that if right clicked the player can choose to go anywhere including dungeons, void, nether, the playerr base, spawn point, any forest however this drop chance is like 1.5% so yeah got to be lucky. Like i said this realm is mostly for xp the player can use to enchant or other stuff.

ANOTHER REALM????? Sai forgive me.
The Ather. -Pls help my eyes-Sai ABSOFLUTELY NOT!-
AadIajhepq needs tons and tons of convincing -Zafar
UNDER CONSTRUCTION

SAI ATTACKER YES I AGREE-Alex YES I AGREE-Eric Sure-Sai
The Sai attacker attacks Sai whenever he gets within 50

Alex

UPDATE: I

- **Human Waste Salmonella (no) WHAT IN THE HELL IS THIS REMOVE THIS NOW I DONT WANT SALMONELLA-Eric needs convincing-sai no-aadi**
- Only for parabola mode
- Makes it so that when the player eats food, they have to go to the bathroom in a cauldron after three days otherwise they get nausea an infinite duration until they go to the bathroom.

- **Fume Fissures Needs convincing-Caleb No-Sai No -Eric**
- Fissures found in Sulfur Caves That release different Gasses that give different effects
- Different effects may include:
  -Poison
  -Nausea
  -darkness
  -Regeneration

-Jump boost
-Speed
-Slowness

- When taken from the creative inventory, placing a fissures become a block that changes to fit the varying size of a fissure (like Redstone Dust but a full block)
- Different fissures have different colors depending on the gasses they emit

- **Fumes kinda interesting -Eric this equals geysers -needs convincing- Sai**
- To be added to the Sulfur Caves biome
- Emitted from fissures in Sulfur Caves
- When the player walks over fissures, they get the corresponding effect for 5 seconds
- If the player stays over a fissure for more than 3 seconds, the effect time is increased by 5 seconds for every additional second.

- **End Leeches Needs convincing-Sai Needs convincing -Eric needs convincing -Zafar No- Caleb**
- When getting attacked by a spectral, there is a 25 percent chance of getting end leeches
- When a player gets end leeches, they get nausea for 2 minutes and poisoning

- **Annoyingness Spectrum Need convincing -Eric X-Sai X but not hidden -Zafar**
- Only to be added to Parabola mode
- A hidden statistic ranging from 1-15 that assigns each biome an annoyingness based on how annoying they are in regular Minecraft gameplay
- If the Annoyingness of the biome a player is in is above 6, the player will experience insanity if they stay in that

biome for excessive amounts of time (about 10 real life minutes)-I DISSAPROVE SAI
- Side effects of insanity may include:
  -Nausea
  -random bursts of instant damage I
  -darkness
  -blindness
  -sudden uncontrollable movements
- If the player stays in a biome with an annoyingness level more than 10 for more than 13 real life minutes, they will start taking 1 damage every second.

- **Armor padding Need Convincing -Eric Needs convincing-Sai needs convincing -Zafar Needs Convincing - Rishaan**
- Applied by using a smithing table and putting in any armor trim with leather
- Lessens damage from projectiles by up to 20%, as the leather partially absorbs the impact.
- When applied to boots, it can decrease fall damage by up to 20%
- Gives the armor a brown outline

- **Vertical slab X-Sai X-Eric X-Theodore yes -Zafar X-Caleb**
- No need to elaborate, just a vertical slab
- Crafting Recipe:

Any stone/wood type		
Any stone/wood type		
Any stone/wood type		

- **Focused Activator X-Caleb X-Eric Needs convincing-Sai no-Zafar X but needs convincing on name-aadi**

- When activated, it sends a redstone signal in only one direction, meaning that if there are inactive redstone torches around it, only one gets activated.
- Can be used to make redstone less annoying
- Crafting recipe:

	Redstone Torch	
Iron Ingot	Block of Redstone	Iron Ingot
Iron Ingot	Iron Ingot	Iron Ingot

- **Cheese updates nonononononononononononononononono-Eric I DISAPPROVE -Sai (Keep cheese there way it is) ITS TERRIBLE -Zafar No-Caleb**

- When cheese is eaten, the player gets jump boost 5, saturation 3, resistance 3, and also gains the ability to fart other players 5 blocks away for 2 minutes and automatically applies Totem of undying abilities to the player
- NOTE: Only in parabola mode
- Also gives a use to the poisoned potato
- Crafting recipe:

Popped Chorus Fruit		Foot fungus mycelium
Raw Pork	Totem of Undying	
Bucket of Water	Bucket of Milk	Poisoned Potato

(The crafting materials are random because it’s CHEESE!!!!)

- **Phoenixes** X-Eric X-Sai X-Caleb yes phonixes -Zafar

- Has 20 health points

- Phoenix nests can be found in the Nether in Warped Forests and Crimson Forests on top of trees. There can be up to 5 nests in one forest
- Phoenixes are passive until provoked, at which point they will fly around in an unpredictable pattern and shoot flaming arrows at the player which deal 4 damage and set the player on fire (note: all fire resistance effects still apply) They will also swoop down at the player, which deals 6 hearts of damage
- Phoenixes cannot be harmed by projectiles, and must be killed with a sword when they swoop at the player
- Phoenixes are provoked when the player mine its egg or when the player hit it
- Phoenixes are very protective of their the playerng, and will occasionally blow fire at their egg to keep it warm
- When an egg is collected, it can be placed on top of a lit campfire and will hatch in 2-3 minecraft days unless disturbed (When the egg is moved off of the fire), and the hatchling will bond with the person who placed the egg
- Once bonded, the phoenix will be like a dog, swooping at whatever attacks it's owner
- When adult phoenixes are killed, they drop 20xp, up to 3 tail feathers, and have a chance of dropping a flame heart
- Baby phoenixes drop nothing

- **Rope bindings Need convincing -Eric I DISSAPPROVE -Sai Needs convincing-Caleb no -Zafar**
- Might be a parabola mode feature
- Can be used to lead players places
- While bound, cannot use weapons or tools but can place blocks and punch their capturer
- When bound, players cannot be killed
- Only way to escape is to punch the capturer to death, break the post if the player is tied to a post, or to have the capturer release the player
- Crafting Recipe:

	String	
Lead	String	Lead
	Totem of undying	

- **Change beds to sleep during the day** X-Sai (Needs changing tho) Needs convincing -Eric No-Caleb
  - Can be used to skip days as well as nights, which may help with phantom hunting ???-Sai
  - Fully heals player during use Needs cost/Convincing -Eric

- **Balloon** X-Sai X-Eric (make it show the air meter like underwater)
  - Not to be added to Minecraft Education (Already exists)
  - No real gameplay usage but, looks nice and floats in the air and is dyeable to any of the 16 dye colors. [the player forgot about our new ones -Eric]
  - Following recipe crafts a deflated balloon, which can be inflated into an inflated balloon:

Rabbit hide	Rabbit hide	Rabbit hide
Rabbit hide	Any dye	Leather
Rabbit hide	Leather	Leash

    - Balloon inflates by holding right click for 3 seconds while holding deflated balloon, and becomes an inflated balloon and can be held like a helium balloon and tied to a fence post (via right click)

Sai (ANTI ERIC)

Heavy Core in arrow: RANGED ORBITAL MACE STRIKE INITIATED no-Eric X-Alex No-Caleb X-Theodore Needs convincing -Zafar for now its a no perhaps-aadi X-Rishaan

Elytra in arrow (Now craftable): SEE YA LATER ARROW Needs convincing -Eric Needs Convincing- Alex This is a parabola mode feature-Sai

Large bundle stores up to 3 stacks in 1 inventory slot; crafting recipe =

	Rabbit Hide	Rabbit Hide
Copper Ingot	Leather	Rabbit Hide
	Rabbit Hide	Leather

Remove healing from hunger; can only heal from external services and leaf bandaging/ice pack need convincing -Eric

Pottery needs an upgrade x-eric X-Aadi (see A137) yes

Golden Chorus Fruit (To tame Spectral)

Golden Beetroot (To Tame & Cure Zoglin) NO- Alex

Make Thirst Affect Heatstroke/Temperature Bar

Players Can now attach Crossbows to Striders (String) To Attack while moving strider (Because the player must be holding the warped fungus on a stick to move strider) yes-. NO- Alex

Golden Pufferfish to Cure Zombie Nautilus X-Alex X-Caleb

Spectral NO-Eric

Endermite will now metamorphosize into a spectral upon finding a Chorus Fruit Flower Block) ?-. . search up a Chorus fruit flower block. -Sai

-To Speed up Transformation Feed Golden Chorus fruit

-Endermite will use enderman (Through Brain Control) to get to Chorus Fruit Flower Block. NO-Aadi (E

Endermite will become neutral if they are fed Golden Chorus Fruit.

Killing Endermite while in pupa state gives 0-1 spectral wing & 0-2 Spectral Scale.

Endermen are now EXTRA Hostile to Pupated Endermites.

Spectral Scales can be used to craft Spectral Scaleplate. Yes-.

-Protects against Dragons breath (Geysers included). yes -.

-Gives as much protection as a Chainmail Chestplate. yes -.

-Applies thorns to any enemy that attacks the player (Damages enemy).

Spectral can be sheared to obtain 1-3 Spectral Scales. Yes brushed? -.

Spectral will Shed Wings every 10-30 minutes If fed Golden Chorus fruit (Give 1-2 Spectral wings).

Killing Spectral gives 1-2 Spectral wings & 1-5 Scales. yes -.

Spectral now has a dash ability (Similar to Nautilus) When in the air (not when perching/sitting on ground). yes -.

Elytra can be crafted using 2 Spectral wings, 3 Scales, & Requires Elytra Upgrade Template from End ship (Otherwise will be flimsy & will make weird, randomized turning (Sometimes not all the time)). nooo -.

Spectral will lay eggs on Chorus Fruit Flower Block (When bred with golden chorus fruit). yes -.

Spectral can be healed with Popped Chorus Fruit.

Enderman will seek out & destroy Spectral eggs (Like zombies with turtle eggs) But instead pick-up & move of Chorus Fruit Flower Block (Causing Eggs to not hatch apon maturity and instead will break & become 1 Spectral Scale)

Spectral Scale Shield:

Spectral Scale	Chorine Ingot	Spectral Scale
Spectral Wing	Spectral Scale	Spectral Wing

	Spectral Scale	

-Can deflect Dragons Breath Fireballs & Ender Pearls.

-Has More Durability. yes -.

-When Entity Attacks the Shield, The Entity is Teleported back 5 Blocks (Can make people clip into walls).

-Entity will receive 3 hearts (6 Damage) when Attacking Shield.

-Lighter Because of Spectral Wings (The player move at walking speed when moving while using Shield)

Spectral Armor can be found in End Cities (Leather-Copper-Gold-Iron-Diamond-) (Netherite Spectral Armor can be made) just make on spectral armor -.

New achievement Let the world go up in flames: rename to flamemaster -.

1. Be lit on every kind of fire (Normal, Soul, Sulfur)
2. Eat ghost pepper
3. Kill 1 Blaze, 1 Magma cube (With Blaze rod Custom Arrow), and have effect Burning 2
4. Grant Achievement

The Dragons breath firecharge is now craftable,

Dragon Scale	Bottle of Dragon’s Breath	Dragon Scale
Chorine Ingot	Fire Charge	Chorine Ingot
Dragon Scale	Chorine Ingot	Dragon Scale

(Crafts 16)

Pearlescent vines now have a kind of berries growing on them (Need help on name)

Echo squid...

Scythe... Needs Convincing-Alex

Blizzard rod now crafts into frost charge (Which is used to craft ice bomb) X-Eric (but no on the ice bomb we already have ice ball) -Eric (ICE BALL IS USED TO CRAFT ICE BOMB ERIC)-Sai

Teargrass is a new ground vegetation only found in the void dimension do i have blockbench permission? HI X-Eric

Remove nomadlife... XXXXXXXXXXXXXXXXX-ERIC nowhy?-aadi

Add enflamed effect is given to the player when they are on fire (Like the freezing effect). Needs convincing -Eric

New damage types:

Fire: Fire... X-Eric

Slashing: Swords, Daggers, and Axes X-Eric

Piercing: Bows, Crossbows, Tridents, and Spears Metals i guess X-Eric

Freezing: Ice bombs/ Ice balls, Snowballs, and Frost charge X-Eric

Smashing: Hammer and Mace X-Eric (hammer should do extra damage on crystal enemies) -Eric

Soul: Soul breach, Soul amulet, Bone daggers, and shridnite stuff... Need convincing -Eric

Magic: Potions, Spells from casting cauldrons (Vials), and Other projectiles X-Eric

Different enemies take different amounts of damage from all these different damage types (they can have resistances and weaknesses) X-Eric (for sure)

Petrified Guardian If the player make the arena a structure sure X-Eric NO(too ocean monumental)-aadi

This new boss (will only spawn in the new crystal hollows cave biome [Only in flooded variant {In a new crystal temple structure}]). The new boss will have 3 phases:

Phase 1: The Petrified guardian will have a tough rocky exterior which is immune to all damage types. The Petrified guardian can only be damaged by piercing damage and only when the damage hits the “eye” of the guardian it will deal damage. After the boss has taken 100 damage, it will move on to phase 2.

Phase 2: The Petrified guardian’s “shell” will break off revealing a crystalline structure with 8 guardian “eyes” on every side in this stage the 4 or 6 of the eyes will be active and can only be damaged with soul type damage. The name will change from “Petrified guardian” to “Crystalized guardian”. When the Crystalized guardian takes 250 damage, it will move on to phase 3.

Phase 3: In this stage the Crystallized guardian will go into a rampage destroying the crystal layer and exposing the Crystal core. In this phase the guardian doesn’t even have “eyes” instead it uses hexagonal crystals to shoot lasers instead and can be damaged by any damage type. Once the Crystal core (Which the Crystalized guardian name changes to) Reaches below 70% health it will start to bash itself violently against the ground causing dendrite crystals to start forming on the ground these crystals must be destroyed by a iron or better pickaxe to start damaging the core again. Once the core has taken 550 damage it will explode into colorful array of crystals in an effort to defeat the player and will drop a crystal key which can be used to open the crystal chest in the corner of the arena.

Attacks

In main document...

Add dechite heart as the drop for mother depth worm: Needs convincing-Aadi Needs Convincing-Rishaan X-Alex

It can be crafted into the heart amulet (Along with 4 totems of undying and 4 palline ingots) gives the user 4 extra permanent hearts (can be healed back unlike absorption hearts) along with a 150% attack damage boost for all damage types. The debuff for this amulet is you have permanent slowness I and a 20% attack speed debuff (the player attacks 20% slower than usual).

*NOTE the player must beat the hardest boss in the game and must collect rare items to craft this item

Add a Amulet upgrade template (Can be found in the crystal chest after the player beats the Petrified Guardian boss [can be duplicated with Amythyst (dendrite?-aadi) crystals]) that can be added to armor to give the player an extra amulet slot per piece of armor with the upgrade on it (the player can get up to 4 extra slots)

Amulet of revenge: X-Alex NO -Eric

This new amulet can be crafted with 4 blastfruit, 1 garnet, and 4 shridnite. This amulet cuts a player health down to half (Per but when a player is killed and has 500 soul, an explosive soul is released and will home toward whatever killed the player and upon contact will explode dealing 14 damage (7 hearts) and will ignore armor. If whatever killed the player is killed by the soul, the player will be revived at 1 health (0.5 hearts) and 50 soul will be regenerated.

Blastfruit X but should give the groundcover an effect as well-Alex NO -Eric

This new groundcover has a chance to spawn in the badlands, and the mesa plateau biomes. Can be used to brew the potion of bursting which causes the entity splashed will explode after death into red goo (That's what it looks like) that deals harming damage to anything that touches it (Can be used to brew potion of harming if groundcover itself is used) (The bursting potion is brewed with the fruit of that groundcover).

Soul trap amulet X-Alex

This new amulet will allow the player to save up an additional 200 soul. Crafted with 8 Shridite shards and 1 diamond.

Soul

(Note I think U guys don't understand what soul does so don't approve or disapprove of this because it is a reminder)

Soul has a gauge (Like experience) on the right side of the players screen and will gain 1 point for every mob killed (Mortal mobs) (Undead don't count) the player has a max of 100 soul points that when reached allows the use of soul attacks or boosting shridite tools/armor.

Example of soul attacks:

- Soul breach (Enchant only usable on axes and maces)[When 100 soul is used shoots 25 souls upward from the attack dealing 2 damage each]
- Soul strike (Enchant only usable on swords, daggers, tridents, and spears)[When 100 soul is used causes the next attack to deal 150% damage and shoots 5 soul horizontally dealing 5 damage each)
- Soul shot (Enchant only for bows and crossbows) [When 100 soul is used shoots an arrow that deals 200% damage and causes soul fire to envelop the enemy]
- Soul siphon I (Enchant for any weapon) [gives 5x the soul per kill]
- Soul siphon II [Gives 10x soul per kill]
- Soul siphon III [Gives 25x soul per kill]
- Amulet of revenge [Requires 500 soul to activate]
- Bone dagger lifesteal

*X means amount not multiplication

All these things deal soul damage which can be used on specific mobs to deal insane damage. These things all require different amounts of soul mining shridnite ore will give the player 20 soul per block mined (this is only the first time the block is broken). The player can also brush soul sand to convert it into soul soil and gives the player 10 soul.

Aadi

1. Echo collar can make the playerr pet respawn (r/minecraftsuggestions) X-Eric Xish-Sai RESOLVED yes-.
2. Some type of savanna temple (like this one) X-eric (make more elaborate)

3. Magma Reefs? No one would see these -Eric No-Sai
4. Give an allay a lantern and it will hold it for the player as the player explore X-eric RESOLVED yes--.
5. Awkward potions prevent piglins from zombifying as seen in A Minecraft Movie X- Eric RESOLVED?
6. Add the occasional Geyser above sulfur caves MCRESOLVED (improve)
7. Sulfur cave corrosion for faster block oxidation (here)(not any use) Need convincing-Eric ALDREADY EXISTS BRO-Sai
8. Coloring pots (r/minecraftsuggestions) and using glow ink and echo shards on them. Maybe-Eric
9. Going to covens of witches on a full moon the player can get an Uncraftable Potion x-(probably)Eric RESOLVED
10. Fireflies can pick up actual fire and use it to create firedust at their bush, which would give fireflies an actual use and firedust would be required for brewing. Need convincing-Eric
11. Copper spleaves as an official block, different breaking mechanics (maybe a filter) Need explaining - Eric
12. Improve the lunar phases and add SEM features like the ecliptic's path and solar/lunar eclipses (Lunar eclipses would be bad) Ask mrs. Velloth about
13. Making skyblock a world challenge type (r/minecraftsuggestions)This could be a world preset (like superflat) X-Eric X- Alex
14. Challenge: Village life (The player cannot leave the village or corresponding fortress) X-Eric
15. Challenge: Nomad Life (The player cannot sleep in the same bed twice, cannot stay in the same chunk for too long, cannot strip mine) X-Eric why no strip mining?-. go on main doc to see code for pvp -Sai
16. Target dummy (can also be scarecrow to scare ravens) and outputs redstone signal based on damage?
17. Sulfur makes purple torches Need convincing- Eric
18. Large boats and very large boats support utilities (crafting/furnace)
19. Boat chains are created using leads, enabling players to have a travelling base at sea

20. Minecarts are attachable to each other Needs changing -Eric needs convincing .
21. Minecarts can reach 70 m/s Needs convincing -Eric yes Thats already in the game (as an experement with commands) but if you mean a vanilla way then yes - Rishaan
22. Boats can reach 70 m/s Needs convincing -Eric yes
23. Horses can reach 24 m/s Needs convincing -Eric yes
24. Allays:
    a. Allays can hold lanterns Maybe -Eric yes
    b. Allays can use tools like pickaxes and shovels; give them an item (such as raw iron) and they will try to collect more of it Need convincing -Eric
    c. However, as the opposite of their twin, vexes, they cannot wield weapons
    d. Copper golems can pass items to and from allays (which makes sense b/c they were in the same mob vote) With gamerule -Eric
    e. Allays are affected by beacons
25. Ravens:
    a. Ravens cannot hold items
    b. However, ravens can read pieces of paper [coming soon] Need convincing -Eric why?
    c. Ravens can also write on pieces of paper Need convincing -Eric why? USELESS ALERT-SAI
    d. Untamed / unfavored ravens will nibble at the playerr wheat but can be scared off using a target dummy Need convincing -Eric
    e. Ravens can also navigate; if the player name a lodestone and then write its name on a piece of paper it will fly to that lodestone Need convincing -Eric yes, let drop stuff there
    f. Unfavored ravens will collect near the playerr house when the player have Bad Omen, but fly off if the player get too close Need convincing -Eric
    g. Allays can trade their items with villagers only when ravens are there Need convincing -Eric
    h. Ravens can also ring bells and press buttons, and other forms of redstone input Need convincing -Eric

    i. They can also help allays fix iron golems Need convincing -Eric
26. Full beacons can give luck if the player put a luck charm inside the beacon need convincing-eric
27. Happy Endermen: { Need convincing -Eric COPIER-SAI
    a. As to follow the lore, a Happy Enderman is created by hanging a mob head from a chorus fruit in the Overworld and having an ender mite crawl into it
    b. The enderman cannot defend itself; that is the price it pays to be happy
    c. Using the fragments of a cocoon or maybe using Chorite, the player can craft structure-block-like items
    d. The player can then call the happy endermen to build that structure
    e. Happy endermen can place blocks
28. Iron golems: Need convincing -Eric
    a. Making a link totem will link the playerr iron golem to the player, they are multiple use
    b. Can hit away ghast fireballs
    c. They can be trimmed with armor trims
    d. Soul version will be more nimble and will not fail to jump 1.0625 blocks at a time (path jump to dirt = 1.0625 blocks)
29. Feather + ink sac = quill, which is a separate item for writing on books or pieces of paper
30. Challenge setting called Distant Horizons: X-eric
    a. Makes it so that the player can only chat with players 25 blocks to the player
    b. gamerule showCoordinates is locked to false
    c. Spyglasses can help the player view chunks really far away
    d. gamerule startingMap is defaulted to true
    e. gamerule cauldronTpRadius is locked to 100
    f. gamerule maxBoatSpeed is locked to 60
    g. gamerule maxMinecartSpeed is locked to 60
31. Blackwood trees from cinnabar blocks (inspiration) Resolved but modified obtaining -Eric

32. Rainbow shulkers Need convincing -Eric
33. Extend the range of beacons X-eric (might get laggy)
34. When the player sleep in the open the player can get killed by mobs, yes campfires repel mobs X-eric Needs Convincing-Sai no
35. Crying obsidian for one-way nether portals Need convincing-Eric No-Rishaan
36. Make items flash before despawning
37. Lapis bricks NO COPYING -ERIC
38. Endillary moss in strongholds to help find the portal room X -ERIC (Rename, endillary is inspired by fritillary plants btw)
39. Creepers run away from the cat music disk No use -Eric
40. Skeletons run out of arrows after a VERY LONG TIME X-Eric
41. Make radonite or alloys of radonite and chainmail disappear when invisible X -Eric RESOLVED
42. Weapon collision Too complicated -Eric if 2 players attack at same 3 frames or so then no hits-.
43. Unlit campfires generate in the deep dark X -Eric yes-.
44. Redstone lanterns with customizable signal strength Already have Redstone lamps, so just overhaul them -Eric
45. End lanterns X-Eric
46. Redstone Striker Need convincing-eric yes-.
47. Overhaul wandering traders (one idea) X -Eric?
48. Invisible item frames using phantom membrane Need convincing-eric YEEESSSSS-.
49. Dinnerbone spy glasses Need convincing -Eric why and ?-.
50. Warding crystals Explain what they are -Eric?
51. Endermen can have some certain types of blocks Need convincing -Eric
52. Dungeons need to be better (like this?) X-eric
53. Rid mushroom islands of phantomsX-eric
54. Enchant all types of armor with frost walkerNeed convincing-eric

55. Coral block and sea pickles stay alive within conduit range X-eric
56. Slingshots COPIED VIDEO-Sai
57. Pets try not to die X-Eric X-.
58. Cravings instead of nutrition Need convincing -Eric X-Sai
59. Algae? Resolved as Fallgae-Eric
60. Dreams as loading screen tips? (just visit the site)
61. The player cannot hit the playerr pets with a certain setting X-Eric
62. Totems of undying are better Make them **LESS** OP -Eric X-Sai no? Instead make harder to get-.
63. Wither drops more xp X -Eric X-.
64. Woodland mansions should be better X-Eric X-Sai X-.
65. Tridents (or a crafting ingredient) should be there in ocean monuments Sai said it should be a wave rod
66. Firework Arrow as a fletching recipe
67. Mushroom caves (no brown mooshrooms)Need convincing-eric
68. Sound effect for leads snapping X-Eric
69. Admin mode
70. Lecterns and Enchanted books
71. Basalt golem? NOOO MORE GOLEMS IN THE SOUTHSOUTHSOTUHEAST -eric
72. Cracking bricks using a pickaxe Realism mode only-Eric
73. Varnish Need convincing/modifications -Eric
74. Wither bones and corresponding bone meal
75. Static and the Temporal Plains in the void dimension
    a. There is a block of static or something of the sort that gives Static glitch block?-.
    b. Static suppresses block updates, eliminating the need for chunky update suppressors (they can already do it, just let them)
    c. The temporal plains have flying-ish particles that fly in the direction of the edge of the Void
    d. No block changes occur here
    e. Note: some of these can be for the void itself and not a distinct biome

76. Complex redstone using colorNeed convincing-eric yes-.
77. Stoppers?Need convincing-eric?
78. Fireproof nbt item tagNeed convincing-eric?
79. Axolotls stay alive on damp blocks
80. VERTICAL SLABSNeed convincing-eric need convincing . X-Rishaan
81. Sculk beetle?Need convincing-eric -. Needs convincing-sai
82. Ruined portals in the nether contain overworld blocksNeed convincing-eric -.
83. Refresh button on an enchanting tableNeed convincing-eric cost xp so yes-.
84. Cauldrons make stewNeed convincing-eric better stew tho-.
85. Renamed items take longer to despawnNeed convincing-eric yes-.
86. Placing messages in bottlesNeed convincing-eric -.
87. Dripstone ~~smelts~~ is refined into calcite NEED CONVINCING-ERIC
88. Protoliths in the End?Need convincing-eric
89. Copper beets? NO-ERIC Maybe Golden Beets-Sai
90. Cavalry enchantment? Need convincing-eric
91. Strongholds and mineshafts should be exposed to caves that are *ahem* ALWAYS connected to the surface yes-. (inspiration)
92. Copper golems can stack on each other’s heads to reach high chests (inspiration)-.
93. Grappling rod so that the player can be a jockey spectral (inspiration/learn more)-. Na-Ender saddle is another contestant
94. Linked chests (inspiration)
95. Echo bed (1 bed + 1 echo shard) (inspiration/learn more) K
96. Challenge: Gather it all (inspiration)
97. Barrels of gunpowder/fish/TNT/other barrel-y stuff in shipwrecks (inspiration)-.
98. Bracket fungi (inspiration)

99. Ruined portals are generated in the overworld first, then their links are generated at the correct place in the nether yes-.
100. Bats be better yes and chance of vampire
101. Suspicious snow
102. More types of totems (like this)
103. Pets are called to the player when blowing a nautilus shell; ravens can be trained to accept different sound yes-.
104. Camel armor no wat?-. USELESS ALERT-SAI
105. Add new extinct mushroom variants acquired from the sniffer sniffing mycelium blocks
106. Our names up there with dinnerbone and grumm
107. Clams are present in the ocean, they have loot like sand, gravel, and the like, with the few valuables like diamonds, emeralds, gold, maps, nautilus shell, and a pearl, and can store an item once picked up, collects sand/gravel silt depending on the biome, and eventually that becomes a pearl
108. Waypoints: {
    a. A structure that spawns in all three dimensions and every single biome, making them unique
    b. Would mostly retain Eric's original waypoint design (but no sea lantern pillar, maybe a trail of particles instead)
    c. Would be dysfunctional, except in the End
    d. The overworld ones would spawn with loot
    e. They use different terrain generation than other things:
        i. One would spawn near a large oasis
        ii. Near a temple
        iii. (maybe) near a village (higher chance if the village is abandoned)
        iv. (maybe) Underground in trail ruins
        v. In a biome that is not seen within 5000 blocks (more sensitive to underground biomes)
        vi. In cheese caves
        vii. Near hot springs

viii. And many more
ix. Never within 100 blocks of each other; if so, a waypoint is generated exactly in between

f. They would always have a lodestone in them
g. They would have a chiseled cauldron that requires having the uncraftable status effect (from the uncraftable potion)

109. Villagers: X-ERIC
    a. Librarians: {
        i. Job Blocks:
            1. Lectern - Primary block
            2. Enchanting table - Makes them give MUCH better enchantments
    b. Functionality:
        i. They can create enchanted books from books. Their lectern acts like an enchanting table but MUCH worse
110. Snowy glade biome where all the structures are buried in a thick layer of snow and sometimes ice, the snow or ice may have archaeology in them, villages that spawn can have tunnel-ish paths RESOLVED-ERIC
111. Achievement: An Avid Miner?
112. Achievement: Journey to the Centre of the World (for entering the Void)
113. Achievement: 24 carrot gold: craft 24 golden carrots (inspiration)
114. Advancement paintings
115. Soul Cresset
116. Wild Update Update
117. More sculk
118. Hydrothermal vents
119. Keybinds can be item specific, so that the player can have different keybinds (comma/period) for elytras than for regular play
120. Hookshot ???-sai
121. Fungal impersonations (inspiration)
122. Keep inventory as a non-cheats feature, but the player lose a row of inventory space

123. Butterflies and moths
124. Different wood-types of ents (inspiration)
125. Great rope and chain ideas
126. Add Blockbirds
127. More birds
128. Great weather ideas
129. Soul sand update ideas
130. Diorite, granite, andesite have more building potential and look better
131. Better storage blocks
132. Wood-type chests
133. Customizable flowerpots with more than one plant
134. 3d end islands
135. Sulfur cube block ideas
136. Earthworks (no shelly dirt tho)
137. Pots:
    a. Anger:
        i. Depicts ‘angry villager’ particles
        ii. Neutral mobs are aggressive, and villager’s trades are bad
        iii. Grants achievement ‘Kind of a Bad Omen’
        iv. Enchant: Curses (binding/vanishing)
    b. Arms Up Pottery Shard:
        i. Grants acheivement ‘A Cause for Celebration’
    c. Archer Pottery Sherd:
        i. Grants achievement ‘Arrowhead’
        ii. Boosts ranged combat when arrows are pulled from this pot
        iii. Enchant: Power / Punch
    d. Blade:
        i. Grants achievement ‘Who Knew Clay Could Be So Sharp?’
        ii. Boosts melee combat under certain conditions
        iii. Enchant: Sharpness / Knockback
    e. Burn:
        i. Grants achievement ‘A Fiery Depiction’
        ii. Enchant: Flame / Fire Aspect
    f. Castor:

        i. Depicts a human (like the Arms Up human) using a chiseled cauldron
        ii. Boosts cauldron spells
        iii. Grants achievement ‘So that’s what those are for...’
        iv. Enchant: Protection or Silk Touch
    g. Crystal:
        i. Depicts a nether quartz crystal
        ii. Grants achievement [unnamed achievement]
    h. Danger:
        i. More mobs spawn
        ii. Grants achievement ‘A Dangerous Journey’
    i. Earthen:
        i. Depicts the same as Globe Banner Pattern
        ii. Makes the player have better luck (don’t die) while travelling
        iii. Grants achievement ‘At Full Scale’
        ~~iv. Enchant: Soul Speed, Swift Sneak~~
        v. Replaces Explorer
    j. Elixir:
        i. Replaces Brewer (it sounds better)
        ii. Boosts effects?? [can be changed]
        iii. Grants achievement ‘Why Can't I Drink This?’
        iv. Enchant: Feather Falling, Respiration (effect-related)
    k. Tear
        i. Depicts a tear
    l. Unknown:
        i. Depicts two runes
        ii. Grants achievement ‘What Does That Say?’
        iii. If it is in an enchanting place, the other 3 sherds’ enchantments are found in the table
        iv. Enchant: Mending and Unbreaking
        v. Tiersystem based
138. Otherside dimension NO AOTHERSIDE -Eric
139. A floataterlike object
140. Lava visibility potions for netherite (and maybe an exclusive ore?) mining

141. Calcite crystals
142. Spyglasses upgrade with calcite NO-Sai quartz is better
143. The flowing caves (with rivers!)
144. Mirrors do not show the player, but silhouettes, and reflect beacon beams
145. Enchant upgrade
146. Mending alternatives:
    a. Photosynthesis
    b. Insert name here please: when the player eat the player armor heals
147. Rock blobs:
    a. Some certain ores generate more near certain rock blobs (like diamond generating near diorite, or iron near granite, feel free to switch it up)
    b. Some ores only found in certain rock blobs
    c. Rocks have more decorative varieties
148. Silverfish drop silver, used in alchemy/magic purposes:
    a. They have automatic Smite (and undead protection)
    b. Used to craft monster cages
    c. Cool alloying purposes
149. Staff I DISSAPROVE (maybe) -Eric
    a. Crafted using silver, an elemental rod, and various gemstones
    b. Abilities:
        i. Shridnite: Will summon a few souls to fight with the player
        ii. Garnet: Will create a shockwave
        iii. Chorite: will allow the player to be summoned by other players or redstone (provided the player gave them a special item)
        iv. Spectrite: Will choose a power based on the situation
        v. Emerald: Will direct the player to structures
        vi. Quartz: is sharp and can be used for combat
        vii. Salt: Will protect the player

150. Villages generate with cushions YES-Eric ye -Zafar I wanna sit down YES-Rishaan
151. Create your own banner patterns on the loom, and also you can choose to center them. Combine others nah-Eric ok -Zafar X-Rishaan
152. End City Upgrades: NEEEDS CONVINCING TO BE ALLOWED-sai X-Rishaan mostly x-eric ya -Zafar
    a. Loom room - contains banners, looms, chests with wool and dye, and a custom banner pattern in an item frame (the pattern is the same as the banners all around the city) X-Eric
    b. Chill room - contains couches and cushions and also a clock and a compass. Needs convincing -Eric
    c. Housing unit - contains four bridges to houses X-Eric
    d. Small house - contains a chest and a brewing stand with potions, a seat, and a small porch. X-Eric
    e. Large house - contains a chest, ender chest, long seat, a porch, and a shulker guard “Sentry” X-Eric
    f. Reactor room - contains nuclear banner signs, and a radonite beacon pyramid that has blocks missing. Echowood sign says ‘WARNING’ in yellow text. A splash potion of jump boost is contained in an item frame. The player can also use pistons at the bottom to remotely repair the reactor. The beacon is absent; the player must obtain it themselves. DISSAPROVE
    g. Terrace farm/farm room - Inside this large room is a chest, multiple composters, and a farm. The farm contains fully grown melon stalks and wheat. On the roof is endstone and endsoil, with chorus fruit and endilary on it. (read next)
    h. Material-smithing room: Contains a crucible that is filled with radonite and a chest with redstone, gold, and even a few diamonds. Only place to get Chorine upgrade template.
    i. Tool-smithing room: Contains many blast furnaces and smithing tables and a chest with iron, gold, diamonds. Also contains a crystallurgy area with diamond crystals nearby.

j. Library: Contains bookshelves with an enchanting setup, as well as chiseled bookshelves with enchanted books, anvil, and grindstone.
k. Intersection: Common room with four bridges and open-sky layout. Sometimes contains an ender chest
l. Target room: Fletching tables and targets
m. Cartography room:

The cartography room will be an End equivalent of this room with yellow and black carpet, and a lodestone compass that leads to the End Citadel
n. Stasis room: Contains multiple stasis chambers. Empty. (Or should they be filled? Hmmm...)

153. Echowood forest and new tree types: x-Eric
a. New tree with chorus plant generation with acacia-like disc leaves at the top and dark-orangeish bark
b. This tree will spawn in its own biome as well as the echowood forests
c. Echowood fringes would be echowood forest w/o the new trees
d. They will be ruined and the leaves will not bear saplings until ender dragon is defeated (cause they're sick)
e. Much more flora and fauna is there, but it is all extinct at the hands of the ender dragon, so you must restore it

f. Sniffers sniffing in endsoil (from end city farms) will get the new plants, including one that turns endstone into more renewable soil. These plants will happily colonize their old homes using biome borders. The End Highlands stay barren even after player restoration
g. Also end animals which will breed naturally in their biome
h. Makes the end alive, but only if the player says so

154. End Highways: new feature that spawns by end cities and leads off toward another or the End Citadel, but its broken and you should fix it YES-Eric X-Sai

155. Endlings: a family of extinct end mobs that are similar and inhabit the middle layer of the updated echowood forests. They consist of a floating head and a torso. X-Eric [comments: Endlings do not spawn until the ender dragon is beaten and all other mobs in the end should be hostile and infected with dragon breath (purple tint and attribute) and once ender dragon is beaten has a green tint and are sometimes no longer hostile. Endlings in the end city will take damage if they leave the room. Respawning the ender dragon does not causes everything to be infected again]
    a. Hopling: mob that hops using a piston-like contraption at the flat bottom of its torso. Naturally collect resources, storing them on head, and breeds naturally, Lives on smaller leaves on the new tree.
    b. Glideling: mob that glides on a floating disc under its torso. Naturally collect sensegrass bundles and will un-corrupt sensegrass, storing in torso, and naturally breed.
    c. Hoverling: mob that hovers. Collects particulate from the skies to breed.
    d. Warpling: octagonal body and teleports to move, collects particulate as well.
    e. The endlings can only be found as pets [comment: WHAT -Eric] in end city housing units, with the warpling being the rarest

f. Endling abilities:
    i. Hoplings can store 1 stack items and follow you with them, only in end

156. New end mob/particle:
a. A particle calculated to feel like a mob (like the firefly but it actually does stuff)
b. Procedure:
    i. Cohesion: Moves toward other particles. Does not change direction.
    ii. Seperation: Moves away from other particles, but seperation deactivates at ~0.1 blocks

Good ideas (may need modification) here, here, here, here, here, here, and here

Inspiration: Me, r/minecraftsuggestions, Nekoma videos NEKOMA VIDEOS??????????? -Eric (still???????????? Its already october)

Rishaan

1. Tnt Golem Needs convincing -Eric Maybe- Theodore
   A Golem that when killed it either drops TNT (50%) or Explodes on the Spot (50%) Can explode when lit by flint and steel or fire charge. When explodes it explodes with a force 4 times that of TNT Can be tamed with TNT, always aggressive to the player unless tamed. NOT tamed when summoned.
2. Music disk (“Jazzy Note Blocks”). When played plays the song found in Alan Beckers AVM shorts episode 5 titled “Note Blocks.” Found in a loot chest/Dropped by the Stick Figure mob (I dont know which loot chest) here (CHEQUE NUMBER 5) eeple maybe idk mostly not -Eric
3. Sawmill
   A stonecutter variant for wood. This block can be crafted with 3 blocks tagged with `#minecraft:planks` and 1 iron ingot. This block will make you be able to turn any block tagged with `#minecraft:planks` into any stair, slab, vertical slab, fence, fence gate, trapdoor, door, etc. (i want to add this to all modes)
4. JERRY (stupid joke idea): A Secret mob that will spawn as a Nitwit villager but has trades and is giant and is just stupid. (can only be spawned with a command) nah-Rishaan

5. Stick Figure: A mob that has a 1% chance of spawning and when spawns the player is alerted through the chat saying (color) Has joined the game (colors can be blue, green, yellow, red, or orange) is nutral mob and will just go about life but IF AGGROED will start fighting just as seen in alan beckers AVM shorts Ep 36. Titled “Bedwars” (Link) When killed can drop any music disk that sounds like either the song from AVM 5 (look at 2.) or a disk from any other note block videos(Here, here, here, here)When Killed grants acheivement AVM is OVER (idk maybe the name should be better) when you play the music disc it drops grants achivement “This is a Catchy song” (AGAIN the name needs to be better). approve on behalf of eric X-Eric
6. Add buffalo that buffalo Buffalo buffalo buffalo buffalo buffalo buffalo buffalo buffalo buffalo buffalo buffalo... No-Rishaan

Theodore

Wheat golem for crops X-Eric X-aad! Ye -Zafar Sure fine why not - Rishaan X-Sai X-caleb

Eric

Charles

Ideas for strawberry Minecraft

Ships in natural harbors filled with loot sometimes mobs NO CHEESE FARTY -Eric

Variants

-Caravel NO-Sai NO -ERIC

-Sloop NO-Sai NO -ERIC

-Carrack NOOB-Sai NO -ERIC

- Galleon Huh?-Sai NO -ERIC

-Warship Newb-Sai NO -ERIC

Info on each

Caravel

Very small, 25-35 blocks, width about 10 blocks, 4 semi-variants, can be oak, birch or acacia, 1-2 masts, NO foremast on hull, back of ship rises up to parallel to rudder, forecastle is VERY small, very little and small amounts of guns on main deck, possible loot is as following:

Stick, gold ingot, iron nugget, diamond, emerald, carrot, treasure map, heart of the sea, apple, golden apple, poisonous potato, copper, stone or iron sword, compass

Ship designs will be provided (2)

Sloop

Small, long and very slim, 30-40 blocks, 7-9 blocks wide, ONLY made of palm wood, cargo vessel or combat ship, spawns ONLY in sheltered, sandy coves with palm trees, no on-deck structures like cabins, a slight deck rise, very long and stable, relatively large amount of guns on each side, 2-3 sails (NOT full square rigging) loot is good (like a pirate ship in the Caribbean) loot is as following:

Sticks, swords, (iron, stone, gold, diamond) iron axes, god apples, apples, bread, carrots, pumpkin pie, stews, diamonds, gold and iron nuggets, iron gear (armor) wool, coconuts, compasses, Redstone, lapis, obsidian, bows, arrows (poison, decay or normal) books, enchanting books (sharpness 1-4) unbreaking, lunge,

thorns, curse of vanishing, feather falling, and piercing, gunpowder, TNT (a TON of it on the gun decks). Loot will be stored only in barrels.

Carrack

Carracks are basically smooshed-down, shorter and wider, more heavily armored and gunned caravels. They have a uneven deck due to the many deck inclinations, cabins, climbs and additional, above-deck gun decks mounted in the especially large forecastle. 35-50 blocks long and about 10-12 blocks wide. Can have large square rig sails and loot is nice, good boost if the player want to speedrun. Have multiple gun decks, especially in VERY high (and ornamental) forecastle. Trading and naval ship. Spawns out mainly in sheltered coves like a jungle with a beach or, more commonly in villages next to the sea.

Loot:

Gold, iron ingots, iron and gold nuggets, diamonds, lapis, emeralds (in a secure chest in forecastle, near captain’s quarters) wheat, cake, seeds (melon, pumpkin, wheat and carrot) apples, oak, spruce and dark oak logs, water and cobblestone. Loot will be stored in barrels and chests. Low amount of TNT and gunpowder in chests and gun quarters.

NO-SAI because to may references to weapons charles.

BRO JUST CALL IT “LEAD WEIGHT” We talked about this just texture something cannonball-shaped and call it “Lead weight” and u shoot it out of a dispenser and it deals 4 Hearts dmg

Buddy there's a GUN DECK????NOOOOOO!!!!!!-SAI

Coconut = Leadweight NO PLZ- ERIC

Debates

10/8/2026 debate: name of angel

Caleb v. Aadi

Name of corrupted angel

Angel is just like a rly weird name that does not belong in minecraft at all,

I feel like angel is perfectly fine since we have wierd stuff anyways like wierd arrows head and stuff

Why

Angels are like supposed to deal in concepts of heaven and the afterlife

IF WE ARE GOING THAT DEEP WE MIGHT AS WELL GET RID OF DRAGONS BECAUSE IN MANY CULTURE DRAGONS AER OF LIFE AND DEATH AND NATURE AND ELEMENTS

RE KEEP

Thats what i said bro

We might s well

But ANGEL IS

WEIRD

Wheever i think of angel i think of random roman statues

It should be like this

Except with wings

Just simplistic like minecraft

I DISAGREE ANGEL IS FINE. THE PLAYERR STILL NOT EXPLAINING WHY ANGEL IS BAD ERIC AND ALEX PERFECTLY FINE WITH THIS. I THINK THATS REALLY BIAS THOUGH AND STEREO TYPICAL

Hell no IT LOOKS WHY MORE COMPLEX THIS JUST PROVE THE PLAYERR NOT REALLY THINKING. PLUS THE REASON MINECRAFT GETS BORINGEVENTUALLY IS BECAUSE IT SO SIMPLE WE CAN ADD STUFF WITHOUT MAKING IT UN MINECRAFTY

WELL THATS WHAT PPL LIKE ABT MINCERAFT SIMPPL NOT GOING DEEP IN A SPECIFIC TOPIC AND IF THEY DONT WANT THAT GO PLAY A DIFFERENT MOD OR A DIFFERENT GAME BUT MINECRAFT is a predetermined set of rules, simple, and from it emerges coplexity.

E AND THAT ITS SIDEBAT**E noT EVERYONE LIKES THAT THATS WHY THERE MODS LIKE REALISTIC MINECRAFT OR BETTER MINECRAFT OR EVEN MINCERAFT DUNGEONS**

NO ITS PERFECTLY FINE CALLING THE CORRUPTED ANGEL THE PLAYERR FREAKING OVERTHINKING LIKE ITS NOT THAT HARD JUST ACCEPT THE NAME.

No

t is weird bro X-aadi Needs convincing-Sai im confused -Zafar

THE PLAYERR OVERTHINKING ITS NOT WIERD. SOMEHOW THE PLAYERR THE ONLY ONE THAT THINKS THIS

10/8/2026 Debate: Sai’s reasoning about potion brewing

Sai v. Eric

Sai: SHOULD POTIONS ALL BE MADE WITH FERMENTED SPIDER EYES BECAUSE ERIC DOESNT LIKE EXPLORATION? SHOULD EVERY POTION = SPIDER FARM AND LARGE MUSHROOM? IN MY OPINION ITS A VERY STUPID IDEA.

Eric: Fermented spider eyes do not inhibit exploration, as each potion still needs its own ingredient, such as sugar for swiftness potions. Furthermore, not all potions we added use fermented spider eyes, such as the potion of luck uses a herb potion and thick potion to brew.

Sai: Ur making it so that all potions are brewable with fermented spider eyes which I don’t like. Lisen, I'm not against fermented spider eyes, I say just keep them the way they are now and leave it that way. I just want it to be possible to brew any potion in the game without the reliance of fermented spider eyes turning like 5 types of potions into 10 (Like how the player make invisibility and harming.

Eric: The player seem to have not read my reasoning as the player just repeated what the player said at first in different words, which means the player have no confidence in the playerr suggestion. READ. MY. REASONING UR BEING WEIRD

10/8/2026 Debate: What effect should pearlescent berries have when brewed

Eric v. Sai

Eric: Pearlescent berries should brew pearlescent potions that give shock resistance as having a new recipe for invisibility would cause the old one to become redundant. Furthermore, pearlescent vines were my idea so I have ownership over what effect pearlescent berries give.

Sai: PEARLESCENT BERRIES ARE PEARLESCENT AND THEY ARE PARTIALLY SEE THROUGH SO IT MAKES THE PLAYER SEE THROUGH AND THE ARE LIKE THE HYPNOSHROOM WHERE THEY HYPNOTIZE PEOPLES EYES TO MAKE THE PLAYER NOT EXIST.

Eric: The playerr not giving any reasoning and the official definition of Pearlescent (adj) according to mariam webster is

pearlescent

/pərˈles(ə)nt/

Pearlescent is an adjective meaning having a soft, lustrous sheen or a gentle play of colors that resembles a natural pearl or mother-of-pearl

The player also have not answered my question about this making the previous invisibility brewing recipe redundant, as we need some way to be resistant to shock. I also created the pearlescent block family, therefore I have mastery and ownership over the effects of these items/blocks/elements. The player are not supporting a strong claim, the player are only picking at the non-important parts of my statement that does not defend the playerrself.

Sai:

BRO IDC ABOUT FARON OK U SAID NOT TO COPY ZELDA BUT NOW U R I SAY THAT IT SHOULD GIVE INVISIBILTY BECAUSE THE CREATURES OF THE JUNGLE ARE ILLUSIVE AND HARD TO SPOT SO INVISIBLITY FITS RIGHT INTO THAT NICHE LOCK IN IDC ABOUT RANDOM DICTIONARY DEFINITION I ONLY CARE ABOUT THE LOGIC BEHIND IT. ALSO STOP CLAIMING THE PEARLESCENT BERRY AS UR IDEA IT WAS MINE OG AND UR JUST STEALING IT FROM ME (CHECK MY SECTION).

Eric: I have authority over it since i am a coder and get to choose what is made and what is not made. Me and aadi co-own the liscense and can kick you out of the copyright if you keep on modifying other people's section without their permition. THIS IS YOUR 1ST WARNING.

10/1/2026 Debate: Eric’s reasons why antennas and receivers suck

Eric v. Alex

Eric: Attenaes and receivers should not be added because these items defeat the purpose of redstone. Redstone is supposed to encourage creativity via having the player perform advanced problem solving, but block that are too “advanced” like these

would cause redstoners to become lazier. On the surface, these blocks may sound like a way to make life easier, but they really just phase out creative methods of remote powering such as bud switching or calibrated sculk sensors. Another reason why attenaes and receivers suck is because the advanced technological feeling given by these blocks do not fit the medieval voxel survival game vibe in minecraft.

4/22/26 Debate: Alloys

Sai v. Eric
Moderator: Aadi

Sai:

Aluminum Should be added because the player could make drones (Redstone), planes, flexible wires, & The player could strengthen steel with it.

Titanium Should be removed because it can only be used to strengthen steel (Aluminum can already do that)

Eric: Aluminum should not be added into Minecraft because many things aluminum can do can be already accomplished with iron, and since weight is not a thing, they are basically the same. Drones and airplanes don’t fit the feel of “nothing making sense (floating blocks, etc.)” feel of fantasy/medieval games, not futuristic modern games. Bendable wires are Redstone dust, so there is no need for electricity in the game, too realistic too). Aluminum if added would be the other version of copper ore before Mojang gave it more uses, and the developers would say “oh its useful”, but in real gameplay, not be needed.

Sai: Ok Then Can we add At least Titanium PLS (For Steel {I'll come up with more unique items that only steel could be used for})

[topic changed, debate ended with Eric as victor]

Sai: Also, in hardcore Chorite/Chorine is useless give me a reason for that because the player are discriminating against all the actually good players out there that want to play our

mod on hardcore. So, add a new usage (WHICH IS WHY I WANT CHOREEL ERIC!?!?!?!?!?!???! [It Could Have a Separate usage {Making Chorite/Chorine Actually useful to many players}])

Eric: Well most players (especially bugrock)don't play hardcore mode and just want keep inventory tools without turning on Sai: 90% of the stuff has no significant purpose (Useless)

Eric: Plus me and aadi discussed a new way to beat the game that needs chorite

How do the player get chorite (without the end?) -Sai

Chorite is a late game item -Eric

Changed the topic

On 4/27/26:

SAI'S REASONS WHY BARNACLES SUCK!

Sai: 90% of the stuff has no significant purpose (Useless)

WHO WANTS BARNACLES?????? Not me -Zafar

1 Looks Disgusting

2 IS Annoying

3 Unlogical design

4 Useless for players (Just attacks and drops an unlogical way to craft a trident [TRIDENTS ARE MADE WITH PRISMARINE])

5 Cursed...

6 Looks like the Imposter from among us (When attacking)

7 WHY!?!?!?!?!?!

8 IT'S NOT A BARNACLE!?!?!?!

9 PEOPLE WILL GET NIGHTMARES AND WE WILL GET SUED!!!

10 NO ONE VOTED FOR BARNACLES IT IS A FACT IT IS WRITTEN!!!!!

X-Aadi

Barnacles are super farty and no-Zafar

Eric just remove the barnacle and make it a sea anemone or something. Furthermore, many of the playerr reasoning lines are just repeating previous statements with different wording.

NO-the concept Sucks-Sai

[topic changed]

Ravens no -eric

Ok, I know the player think ravens are way too OP and maybe the player are correct, but I have made some changes to the raven.

The raven can no longer hold items, that is for the Allay to do

Ravens are now essential in carrying messages (for the No Chat Challenge), navigating (Allays will follow ravens to Lodestones), and communication (Ravens must be there for allays to deliver shipments or trade with villagers)

This means that the player can create large ‘creature mines/farms’ where allays, copper golems, and ravens work with others (iron golems, meerkats, villagers) to make a complex system.

Ok now They are considerable -Sai But allays are still underused -Sai

Agreed with sai -Eric

Agreed with eric -Zafar

[added 10/26: can you optimize some of the code so the game doesnt lag] [unresolved]

REMOVE ALLOYS!

Aadi: Hi eric, i am guessing this was u, btw sai agreed to the infinite alloy thing that the player had suggested

NO ALLOYS FOR NORMAL MODE ONLY FOR REALISM -eric i aproove of what eric just said -Zafar

Aadi’s argument about ‘originality’

Aadi: The player have been saying that I never add original ideas and all my ideas are based off something like The playerTube or r/minecraftsuggestions when really the player are not that original either. If the player want to prove that the player have original ideas, add them in the sections below. (don't worry Charles and Ved, the player are fine) (TAXONOMY DOSEN’T COUNT)

AADI STOP COPYING EVOLUTION and biology -Eric

Aadi’s original ideas

-Covenant of witches

-Snowy glade

-The Abyss (dimension)

-Radonite

-Palline

-Waypoint upgrades (using for teleportation)

-Nomad Life

-Village Life

-All the upgrades to oases

-All the Desert Temple upgrades

-ComScript

-Realistic IRON smelting

-adding no escape music disc

Unimplemented

-Upgrades to pottery

-Item-specific keybinds

-Quills

-Allays can use tools

-Pottery upgrade

-Keep inventory as a no cheats setting

-Updates on villagers (depression level, multiple job locks)

-Enchanting requires knowledge book

-Camel Armor

Eric: If the player do the math then the percentage of these original ideas to all of the playerr suggestions is far below the standard we want.

Eric’s original ideas

END UPDATE not very origonal ngl -Zafar

The ideas in it are original.

[This thread is no longer active and will be archived]

Sai’s original ideas

Spectral

~~All alloys~~

Lapis golem

Dechite/Dechine

Ice temple

Ghost peppers

UPGRADED OCEANS

Oceanic rod

Piglin stamp

Spectral Scaleplate

Spectral Shield

Snatchers

Snatchling cloak

Grappling hook

Chorus wasps

unimplemented

Hoglin taming

Hoglin armor

Golden Chorus Fruit

Dragons

By aadi

Sai: idk why ur crashing out we will have 13-14 bosses anyways

My compromise:

5 dragons: fire, water, nature, wind) and metal [based off of wuxing]

No this is based off of wuxing so no lunar dragon bruh WHy? Thats just sad

WHY WOULD THE PLAYER HAVE A LUNAR DRAGON BRO (I GUESS BRo) - eric

But yea. This will be good:

List of bosses

- Wither
- Ender dragon (obviously)
- Mancer
- Water guy
- Fire guy
- Plant dude
- Metal thingamabob
- Winderiser
- Stomach bacterial dragon [parabola mode only]

Bearer of souls

- angel is a mini boss thing right????? oops NO its a boss
- Chorus leviathen
- Mecha wither?????? Weird aah-AADi boo mecha wither -Zafar

- Dream keeper?? X-Eric boo dream keeper -Zafar

Fine -Eric

Task: Forward to caleb -Eric [assigned to: Aadarsh]

Name of corrupted angel

Angel is just like a rly weird name that does not belong in minecraft at all, no -Zafar

I feel like angel is perfectly fine since we have wierd stuff anyways like wierd arrows head and stuff

Why

Angels are like supposed to deal in concepts of heaven and the afterlife

IF WE ARE GOING THAT DEEP WE MIGHT AS WELL GET RID OF DRAGONS BECAUSE IN MANY CULTURE DRAGONS AER OF LIFE AND DEATH AND NATURE AND ELEMENTS

[Added later: 10/19: bro chill it cannot be that deep altho we're still adding dragons cuz its tuff -Eric] boo to adding chinese dragons to minecraft -Zafar

RE KEEP

Thats what i said bro

We might s well

But ANGEL IS

WEIRD

Whenever i think of angel i think of random roman statues

It should be like this

Except with wings

[Added later: 10/19: Counterargument: Whenever I think of fairy I think of some random-ah children’s storybook -Eric]

Just simplistic like minecraft

I DISAGREE ANGEL IS FINE. THE PLAYERR STILL NOT EXPLAINING WHY ANGEL IS BAD ERIC AND ALEX PERFECTLY FINE WITH THIS. I THINK THATS REALLY BIAS THOUGH AND STEREO TYPICAL [10/19:X-Eric]

Hell no IT LOOKS WHY MORE COMPLEX THIS JUST PROVE THE PLAYERR NOT REALLY THINKING. PLUS THE REASON MINECRAFT GETS BORINGEVENTUALLY IS BECAUSE IT SO SIMPLE WE CAN ADD STUFF WITHOUT MAKING IT UN MINECRAFTY

WELL THATS WHAT PPL LIKE ABT MINCERAFT SIMPPL NOT GOING DEEP IN A SPECIFIC TOPIC AND IF THEY DONT WANT THAT GO PLAY A DIFFERENT MOD OR A DIFFERENT GAME BUT MINECRAFT is a predetermined set of rules, simple, and from it emerges coplexity.

E AND THAT ITS SIDEBAT**E noT EVERYONE LIKES THAT THATS WHY THERE MODS LIKE REALISTIC MINECRAFT OR BETTER MINECRAFT OR EVEN MINCRAFT DUNGEONS**

NO ITS PERFECTLY FINE CALLING THE CORRUPTED ANGEL THE PLAYERR FREAKING OVERTHINKING LIKE ITS NOT THAT HARD JUST ACCEPT THE NAME.

No

t is weird bro X-aadi Needs convincing-Sai needs explaining -Zafar

THE PLAYERR OVERTHINKING ITS NOT WIERD. SOMEHOW THE PLAYERR THE ONLY ONE THAT THINKS THIS

Archive

Permanent fire resistance potion

Cotton: Used as alternative material for beds and wool

Antenna

Remote Controlled Transmitter

Sai's Section duplicate(Belongs in Archive)

Heavy Core in arrow: RANGED ORBITAL MACE STRIKE INITIATED no-Eric X-Alex No-Caleb X-Theodore needs convincing -Zafar for now its a no PErhaps-aad! Ooo good idea i say X-Rishaan
Elytra in arrow (Now craftable): SEE YA LATER ARROW Needs convincing -Eric Needs Convincing- Alex This is a parabola mode feature-Sai
Large bundle stores up to 3 stacks in 1 inventory slot; crafting recipe =

	Rabbit Hide	Rabbit Hide
Copper Ingot	Leather	Rabbit Hide
	Rabbit Hide	Leather

Remove healing from hunger; can only heal from external services and leaf bandaging/ice pack need convincing -Eric
Pottery needs an upgrade x-eric X-Aadi (see A137) yes
Golden Chorus Fruit (To tame Spectral)
Golden Beetroot (To Tame & Cure Zoglin) NO- Alex
Make Thirst Affect Heatstroke/Temperature Bar

Players Can now attach Crossbows to Striders (String) To Attack while moving strider (Because the player must be holding the warped fungus on a stick to move strider) yes-. NO- Alex
Golden Pufferfish to Cure Zombie Nautilus YES-CALEB X-Caleb
Spectral NOOOOOOO -Eric
Endermite will now metamorphosize into a spectral upon finding a Chorus Fruit Flower Block) ?-. . search up a Chorus fruit flower block. -Sai
-To Speed up Transformation Feed Golden Chorus fruit
-Endermite will use enderman (Through Brain Control) to get to Chorus Fruit Flower Block. NO-Aadi (E
Endermite will become neutral if they are fed Golden Chorus Fruit.
Killing Endermite while in pupa state gives 0-1 spectral wing & 0-2 Spectral Scale.
Endermen are now EXTRA Hostile to Pupated Endermites.
Spectral Scales can be used to craft Spectral Scaleplate. Yes-.
-Protects against Dragons breath (Geysers included). yes -.

-Gives as much protection as a Chainmail Chestplate. yes -.

-Applies thorns to any enemy that attacks the player (Damages enemy).
Spectral can be sheared to obtain 1-3 Spectral Scales. Yes brushed? -.
Spectral will Shed Wings every 10-30 minutes If fed Golden Chorus fruit (Give 1-2 Spectral wings).
Killing Spectral gives 1-2 Spectral wings & 1-5 Scales. yes -.
Spectral now has a dash ability (Similar to Nautilus) When in the air (not when perching/sitting on ground). yes -.
Elytra can be crafted using 2 Spectral wings, 3 Scales, & Requires Elytra Upgrade Template from End ship (Otherwise will be flimsy & will make weird, randomized turning (Sometimes not all the time)). nooo -.

Spectral will lay eggs on Chorus Fruit Flower Block (When bred with golden chorus fruit). yes -.
Spectral can be healed with Popped Chorus Fruit.
Enderman will seek out & destroy Spectral eggs (Like zombies with turtle eggs) But instead pick-up & move of Chorus Fruit Flower Block (Causing Eggs to not hatch apon maturity and instead will break & become 1 Spectral Scale)
Spectral Scale Shield:

Spectral Scale	Chorine Ingot	Spectral Scale
Spectral Wing	Spectral Scale	Spectral Wing
	Spectral Scale	

-Can deflect Dragons Breath Fireballs & Ender Pearls.
-Has More Durability. yes -.
-When Entity Attacks the Shield, The Entity is Teleported back 5 Blocks (Can make people clip into walls).
-Entity will receive 3 hearts (6 Damage) when Attacking Shield.
-Lighter Because of Spectral Wings (The player move at walking speed when moving while using Shield)
Spectral Armor can be found in End Cities (Leather-Copper-Gold-Iron-Diamond-) (Netherite Spectral Armor can be made) just make on spectral armor -.
New achievement Let the world go up in flames: rename to flamemaster -.

5. Be lit on every kind of fire (Normal, Soul, Sulfur)
6. Eat ghost pepper
7. Kill 1 Blaze, 1 Magma cube (With Blaze rod Custom Arrow), and have effect Burning 2
8. Grant Achievement
   The Dragons breath firecharge is now craftable,

Dragon Scale	Bottle of Dragon's Breath	Dragon Scale
Chorine Ingot	Fire Charge	Chorine Ingot
Dragon Scale	Chorine Ingot	Dragon Scale

(Crafts 16)
Pearlescent vines now have a kind of berries growing on them (Need help on name)
Echo squid...
Scythe... Needs Convincing-Alex
Blizzard rod now crafts into frost charge (Which is used to craft ice bomb) X-Eric (but no on the ice bomb we already have ice ball) -Eric (ICE BALL IS USED TO CRAFT ICE BOMB ERIC)-Sai
Teargrass is a new ground vegetation only found in the void dimension do i have blockbench permission? HI X-Eric
Remove nomadlife... XXXXXXXXXXXXXXXXX-ERIC nowhy?-aadi
Add enflamed effect is given to the player when they are on fire (Like the freezing effect). Needs convincing -Eric
New damage types:
Fire: Fire... X-Eric
Slashing: Swords, Daggers, and Axes X-Eric
Piercing: Bows, Crossbows, Tridents, and Spears Metals i guess X-Eric
Freezing: Ice bombs/ Ice balls, Snowballs, and Frost charge X-Eric
Smashing: Hammer and Mace X-Eric (hammer should do extra damage on crystal enemies) -Eric
Soul: Soul breach, Soul amulet, Bone daggers, and shridnite stuff... Need convincing -Eric
Magic: Potions, Spells from casting cauldrons (Vials), and Other projectiles X-Eric

Different enemies take different amounts of damage from all these different damage types (they can have resistances and weaknesses) X-Eric (for sure)
Petrified Guardian If the player make the arena a structure sure X-Eric NO(too ocean monumental)-aadi
This new boss (will only spawn in the new crystal hollows cave biome [Only in flooded variant {In a new crystal temple structure}]). The new boss will have 3 phases:
Phase 1: The Petrified guardian will have a tough rocky exterior which is immune to all damage types. The Petrified guardian can only be damaged by piercing damage and only when the damage hits the “eye” of the guardian it will deal damage. After the boss has taken 100 damage, it will move on to phase 2.
Phase 2: The Petrified guardian’s “shell” will break off revealing a crystalline structure with 8 guardian “eyes” on every side in this stage the 4 or 6 of the eyes will be active and can only be damaged with soul type damage. The name will change from “Petrified guardian” to “Crystalized guardian”. When the Crystalized guardian takes 250 damage, it will move on to phase 3.
Phase 3: In this stage the Crystallized guardian will go into a rampage destroying the crystal layer and exposing the Crystal core. In this phase the guardian doesn’t even have “eyes” instead it uses hexagonal crystals to shoot lasers instead and can be damaged by any damage type. Once the Crystal core (Which the Crystalized guardian name changes to) Reaches below 70% health it will start to bash itself violently against the ground causing dendrite crystals to start forming on the ground these crystals must be destroyed by a iron or better pickaxe to start damaging the core again. Once the core has taken 550 damage it will explode into colorful array of crystals and will drop a crystal key which can be used to open the crystal chest in the corner of the arena.
Attacks
In main document...

Remove caleb... (LOOK IN COMMENT STRING BEFORE RAGING) [RESOLVED]
Add dechite heart as the drop for mother depth worm: Needs convincing-Aadi Needs Convincing-Rishaan
It can be crafted into the heart amulet (Along with 4 totems of undying and 4 palline ingots) gives the user 4 extra permanent hearts (can be healed back unlike absorption hearts) along with a 150% attack damage boost for all damage types. The debuff for this amulet is you have permanent slowness I and a 20% attack speed debuff (the player attacks 20% slower than usual).
*NOTE the player must beat the hardest boss in the game and must collect rare items to craft this item
Add a Amulet upgrade template (Can be found in the crystal chest after the player beats the Petrified Guardian boss [can be duplicated with Amythyst (dendrite?-aadi) crystals]) that can be added to armor to give the player an extra amulet slot per piece of armor with the upgrade on it (the player can get up to 4 extra slots)
Amulet of revenge: X-Alex
This new amulet can be crafted with 4 blastroot, 1 garnet, and 4 dendrite. This amulet cuts a player health down to half (Per but when a player is killed
Blastroot X-Alex
This new groundcover that has a 7.5% chance to spawn instead of glowroot. Can be used to brew the potion of bursting which causes the entity splashed will explode after death into red goo (That's what it looks like) that deals harming damage to anything that touches it (Can be used to brew potion of harming if added on awkward potion) (The bursting potion is brewed with normal water bottle).
blocks of the mobs and start spamming his chat with incredibly long complains about small flaws. And When a player that is not Sai encounters it, it will spam eep in chat annoying the player until he goes away. And will attack by poking. Each poke annoys the player giving the player annoyed effect.

```
Only in parabola mode (but is really realistic so i
mean....)
```

ANGEL IS LIKE A COOLER MORE EPIC NAME THEN FAIRY

Xia, Eric

ZAFAR SAID ANGEL IS BETTER

Aggarwal, Aadarsh

ANGEL IS NOT IN MINCERAFT

Zhang, Caleb

EXACT;Y

Xia, Eric

TAKE THAT AADI

Aggarwal, Aadarsh

AND SHOULD NEVER BE

Zhang, Caleb

NGEL IS

Xia, Eric

WOMP WOMP AADI

Zhang, Caleb

MINECRAFT ANGEL IS MINECRAFT

Xia, Eric

HE SAID "CORRUPTED ANGEL IS JUST BETTER"

Zhang, Caleb

KICK AADI CANNOT BE THIS HARD

Aggarwal, Aadarsh

also what is with the normal angel

Xia, Eric

AID "CORRUPTED FAIRY IS GARBAGE"

Xia, Eric

ZAFAR SAID

Aggarwal, Aadarsh

what is with the noramal angel

Zhang, Caleb

EXACTLY GOTTA GO TO LUNCH BYE

Xia, Eric

THATS WHY AADI HAS CAN REVIEW

Aggarwal, Aadarsh

and what is it

Zhang, Caleb

MA ADD THAT SOON

Xia, Eric

BYE

Aggarwal, Aadarsh

and why does it exist

Prakar, Sai chatura

I honestly don't care

Lunar dragon debate string

Xia, Eric

no lunar dragon

Zhang, Caleb

I thought u said yes above

Prakar, Sai chatura

NOO

Barnacle debate string 1

watch a video about it, it latches onto player

Xia, Eric

then drags player down to depths until player drowns

Xia, Eric

will make oceans more diverse

Aggarwal, Aadarsh

yes, i watched. it could be kinda rage-bait tho

Xia, Eric

ya

Xia, Eric

btw if found ur repos on github

Aggarwal, Aadarsh

what?

Xia, Eric

*repository

Aggarwal, Aadarsh

it is called uncraftable-strawberry-pickaxe

Xia, Eric

i know

Aggarwal, Aadarsh

Did the player mean: btw i found ur repos on github

Aggarwal, Aadarsh

the player said if

Xia, Eric

y

Xia, Eric

oh

Aggarwal, Aadarsh

oh ok, did u commit any files??

Xia, Eric

no, i made some blockbench stuff tho

Xia, Eric

i made texture for chorite and chorine

Aggarwal, Aadarsh

commit them into other_files/Strawberries

Xia, Eric

and end anchor

Aggarwal, Aadarsh

Good, commit them

Xia, Eric

not ready yet

Aggarwal, Aadarsh

oh

Xia, Eric

y is this turining into a comment string

Aggarwal, Aadarsh

yep. Start over

Xia, Eric

heee hooo haaa huuuu

Prakar, Sai Chatura

NO BARNACLES (I have 10 reasons why)

Misc debates

Lantern on a stick would help players explore and look for ores without actual going there, which would be good for looking for stuff on the ceiling of a cave

Aggarwal, Aadarsh

No, it is because of an alternative idea of having an allay hold on to the lantern for the player, also having a lantern on a thin cord like that is just weird

Prakar, Sai Chatura

How is that weird

Prakar, Sai Chatura

Also how would the player command the allay into the dark area (Deep pit)

Prakar, Sai Chatura

Projectiles are just better

Prakar, Sai Chatura

(The head of the lantern when the player fish is a projectile)

Aggarwal, Aadarsh

The player would throw an amethyst shard down there

Aggarwal, Aadarsh

or another lantern

Aggarwal, Aadarsh

that way the allay wants to pick it up because it is holding a lantern

Aggarwal, Aadarsh

@Xia, Eric btw lantern on a stick is also copied from nekoma video

Ideas for strawberry Minecraft

Ships in natural harbors filled with loot sometimes mobs

Variants

-Caravel NO-Sai NO -ERIC no -Zafar

-Sloop NO-Sai NO -ERIC no -Zafar

-Carrack NOOB-Sai NO -ERIC no -Zafar

- Galleon Huh?-Sai NO -ERIC no -Zafar

-Warship Newb-Sai NO -ERIC no -Zafar

Info on each

Caravel

Very small, 25-35 blocks, width about 10 blocks, 4 semi-variants, can be oak, birch or acacia, 1-2 masts, NO foremast on hull, back of ship rises up to parallel to rudder, forecastle is VERY small, very little and

small amounts of guns on main deck, possible loot is as following:

Stick, gold ingot, iron nugget, diamond, emerald, carrot, treasure map, heart of the sea, apple, golden apple, poisonous potato, copper, stone or iron sword, compass

Ship designs will be provided (2)

Sloop DISSAPROVE NO WAY -ERIC EEEP-Sai i havent read it, but no-Zafar

Small, long and very slim, 30-40 blocks, 7-9 blocks wide, ONLY made of palm wood, cargo vessel or combat ship, spawns ONLY in sheltered, sandy coves with palm trees, no on-deck structures like cabins, a slight deck rise, very long and stable, relatively large amount of guns on each side, 2-3 sails (NOT full square rigging) loot is good (like a pirate ship in the Caribbean) loot is as following:

Sticks, swords, (iron, stone, gold, diamond) iron axes, god apples, apples, bread, carrots, pumpkin pie, stews, diamonds, gold and iron nuggets, iron gear (armor) wool, coconuts, compasses, Redstone, lapis, obsidian, bows, arrows (poison, decay or normal) books, enchanting books (sharpness 1-4) unbreaking, lunge, thorns, curse of vanishing, feather falling, and piercing, gunpowder, TNT (a TON of it on the gun decks). Loot will be stored only in barrels.

Carrack

Carracks are basically smooshed-down, shorter and wider, more heavily armored and gunned caravels. They have a uneven deck due to the many deck inclinations, cabins, climbs and additional, above-deck gun decks mounted in the especially large forecastle. 35-50 blocks long and about 10-12 blocks wide. Can have large square rig sails and loot is nice, good boost if the player want to speedrun. Have multiple gun decks, especially in VERY high (and ornamental) forecastle. Trading and naval ship. Spawns out mainly in sheltered coves like a jungle with a beach or, more commonly in villages next to the sea.

Loot:

Gold, iron ingots, iron and gold nuggets, diamonds, lapis, emeralds (in a secure chest in forecastle, near captain’s quarters) wheat, cake, seeds (melon, pumpkin, wheat and carrot) apples, oak, spruce and dark oak logs, water and cobblestone. Loot will be stored in barrels and chests. Low amount of TNT and gunpowder in chests and gun quarters.

NO-SAI because to may references to weapons charles.

BRO JUST CALL IT “LEAD WEIGHT” We talked about this just texture something cannonball-shaped and call it “Lead weight” and u shoot it out of a dispenser and it deals 4 Hearts dmg

Buddy there's a GUN DECK????NOOOOOO!!!!!!-SAI

Coconut = Leadweight NO PLZ- ERIC

Ok so im tired of reading and aprooving things so ima put my ideas down -Zafar

Zafar

WE NEED TO ADD AN ALCHEMY TABLE

(this is for normal AND parabola btw)

Alchemy table is an upgraded version of the brewing stand. It can only brew one potion at a time. The alchemy table has one potion slot, one fuel slot, and 2 ingredient slots. The alchemy table can also make some unique and power 3 potions.

Crafting recipie:

0 5 1 0=nothing 1=glass bottle 2=dragons breath

1 3 2 3=glass block 4=blaze rod 5=brewing stand

0 4 0

ONLY FOR PARABOLA \/ \/ \/ \/ \/ \/ \/ YOU'RE MAKING MY DYSLEXIC -Eric lol -Zafar

Holy Cheese and lots of other stuff:

Holy cheese is a late to very late game item and is obtained my killing the holy cow miniboss. the holy cow mini boss is a very massive cow that is flying has a halo over its head and is also spinning very, very fast. The holy cow is always moving towards the player 3 blocks a second, 5 after you beat it once and has its own attacks that t has. Attack 1 is a dash. It dashes towards the player 15 blocks. Whenever the holy cow touches the player it inflicts 20 damage, 35 after you have beat it once. Its second attack if spraying helly milk at the player. this gives the player nasea, poison, leathal poison, and decay for 5 seconds, 12 seconds after the player has beaten it once. The holy cow boss drops holy milk. taking the holy milk it drops into an autrailia or moonstone couldroun idk and then crafting the holy cheese using 6 holy cheese curds. (using cauldron gives you 6) holy cheese is some of the best things in the game and can be used to make holy cheese swords, pickaxe, axe, shovel, hoe, armor, liver, vestilacheese, and other stuff. Other uses for the holy milk while its in the cauldron are making helly cheese. Helly cheese looks like holy cheese but with its main

color being blood red. Eating helly cheese gives you nausea forever, blindness for 20 mins, lethal poison, decay, and normal poison for 40 mins. To actually make helly cheese you need to put holy milk into a molten cauldron and then drop a lava orb (wind charge surrounded by lava bucket) into the holy milk making it helly milk turning into helly cheese curds where you can then craft helly cheese with 6 helly cheese curds (it drops only 4) helly cheese is moslty used to get negative modifiers which you need to battle the foot miniboss (not created yet btw). To get the negative modifiers you need to get the alchemy lab (not made yet but should be an advanced version of the brewing stand in parabola mode and in normal) and infused with specific ingredient to make potions that give different modifiers when you drink them like player takes 2x damage for example except the description will not be direct to what it actually does (also if your reading this pls make a table for modifiers with section of ingredient (1) and the modifier given when you'd rank the potion) once you get all of the modifiers you have to craft a block of block of helly cheese by making a block of helly cheese (helly cheese in all craft slots) then make the block of block of helly cheese (block of helly cheese in all craft slots) the player has to make a hellen't cheese potion using the alchemy table using the block of block of helly cheese and use the grindstoneone on the hellen't cheese potion and then it summons the foot mini-boss. The foot mini-bosses attacks, including: smashing: it smashes down and attacks the floor. If you are in a 7x7 are of the smash in all direction including y-axis then you take 72 damage. Its second attack is toenail fungus gas: it makes a 10x10 block radius around it where if you are standing in it you will get fatal poison, decay, darkness, nausea, and normal poison all for 5 secs refreshed every tick in the gas cloud. The gas smoke lasts 12 secs. The third attack is it attacks every 7 seconds and can’t do any of its attacks 4 times in a row. Once you beat the foot you get something.

Alloy revamp [Resolved]

Steel [Iron & Nickel, Titanium, Aluminum & Coal]

Bronze [Copper & Tin]

Brass [Copper & Zinc]

Rose Gold [Gold & Chorite]

Choreel [Chorite & Steel]

Magnite [Lodenite & Iron]

Shridstone [Shridnite & Redstone]

Nethelline [Netherite & Palline]

This debate has been moved to the debates section

Eric

Stuff to add:

PUT A “X” if the player agree Boosts melee combat

-Underwater vents

-Tool trims X-Aadi X-Sai

-Terrain encorporates mud to naturally generate in areas X-Aadi

-Muddy water/dirty water in areas with lots of mud X-Aadi

-Prismatic sulfur pools like this one X-Aadi

-Sulfur vents in sulfur caves X-Aadi

- (Sai wants this) Jungle/Plantain spider X-Sai

-Renewable sulfur X-Sai

-Overhaul the parched X-Sai

-Rare “ancient dyes” such as aqua, caramel, lush (aqua x yellow), made from pitcher plants and torch flowers X-Aadi Aso one unique to pink sheep [laser lemon]

-Mesa wells? NO-Aadi NO-Sai

-Lepidendron trees instead of echowood but with same properties found in outer end islands example NO-Aadi NO-Sai

-Spray potions Maybe-Aadi X-Sai needs explaining -Zafar

-Glowsquid ink sacs make banners glow in the dark X-Aadi ye -Zafar

-Phantom membranes make the background of the banner transparent so the player can make large letters easier to make. X-Aadi Copier-Sai

-Banners can be put in boats X-Aadi NO-Sai (Copying video add other features if going to add)

-Feather falling boots don't trample crops when the player're jumpine X-Aadi ye -Zafar

-S;/ type of tnt does not drop items when exploding, requires blaze powder to craft – X-Aadi Why-Sai why -Zafar

-Pot husk – Need-convincing-Aadi

Husk holding cracked pot that can be used as projectile, gives the player blindness

-Door zombie – NO-Aadi

Zombie holding door that can use door as a shield and use it to slam the player NO-Alex

-End geyser shoots dragon's breath at the player to make ender dragon fight harder, but if the player have milk the player can use it to launch the player onto an obsidian pillar. X-Aadi X-Sai NO-Alex yes but milk should only clean of effect -Zafar

-Calcite generates around sulfur caves instead of granite, tuff, and diorite X-Aadi X-Sai

-Sulfur pools are elevated from the ground and generate in groups instead of being scattered X-Aadi Needs convincing-Sai

-Bearer of souls (necromancer of the nether) X-Aadi Needs convincing-Sai

-Lense on top of beacons are now cannons that focus the beacon beam at phantoms - Need-convincing-Aadi NO-Sai

-Punching mobs will holding wool makes them not take damage, making transporting mobs easier - With feathers, not wool - Aadi

-Cheese gives the player effect immunity for 5 seconds, which makes shulkers less annoying ?-Aadi How to obtain...-Sai

-More crops X-Aadi

-Honeycomb lengthens noteblock sounds X-Aadi X-Sai

-Make settings button big again and put it before the marketplace button X-Aadi X!!!!!-Sai

-Roll back bugrock UI for brewing stands X-Aadi

-Remove ravens from current document NO!-Aadi X-Sai

-Use fletching table to customize arrows {

Base:

Phantom membrane: faster arrows, further shot

Wheat: Cheap arrows but low aim quality

Raven feather: EVEN Further shot (Good if the player're a snoypier)

Spectral wing: Creates wind burst

Shaft:

Blaze rod: Bursts into fire upon impact

Breeze rod: Low gravity arrow

Iron or Copper Bars: More Durability

Bamboo: Bendy arrow (Curves randomly in the air)and has a 25% chance to deflect off walls.

Tip:

Prismarine shard: Underwater arrow

Amethyst shard: Shatters blocks, deals more damage

Echo shard: Auto aims to the closest entity

Glow squid ink sac: Light up arrow (Like torch underwater)

Gunpowder and flint: Slight explosion upon impact

Glowstone dust: Spectral Arrow

Redstone dust: Weak Redstone signal (When shot)

Shears: Shoots & Breaks through copper grates, leaves, etc.

Slimeball: Bouncy arrows} X-Aadi

Honey Bottle: Sticky arrows (Good for traps)

Sponge: Water soaking

TNT: BIG Explosion

Dagger: Increased Damage

-Copper grates can be used as pipes if waterlogged, can support flowing water X-Aadi

-Lantern on a stick to light up areas before the player explore them, the minecraft version of brightbloom seeds (only sai will get this) Need convincing-Aadi

-Watermelon now grows sideways, so the stem connects to the rind of the melon X-Aadi WHY?-Sai

-Glistening melons are edible regenerating a heart without having to wait for like 5 hours to heal X-Aadi Copier-Sai

-Baobab trees have a 40% chance to generate with water inside of them X-Aadi

-Baobab rope/string X-Aadi NEKOMA ALERT-SAI

-Barnacle from 2017 mob vote no-Aadi NO-SAI

-Remove chorite-gold alloy from mc mod ideas NO-Aadi

U know i made chorite

-More food options if ur starving in the nether X-Aadi (Note: Ask sai abt this we talked abt it)

-Effect bonus for eating roasted sensegrass tuber X-Aadi

-Change so that spectrals are tamed with sensegrass tubers X-Aadi NO!!! GOLDEN CHORUS FRUIT INSTEAD -SAI [added later: see debate]
